Dempsey Holds Championship

On Wednesday, July 4th, in the fight between Dempsey and Gibbons which was staged in Estevan, Saskatchewan, Jack Dempsey retained the World Heavyweight Championship. The fight, contrary to general expectation, started the night fifteen rounds without a knockout. Dempsey won the decision on points than holding his championship. The fight by rounds was fairly close, although Dempsey had a little the best of it all through and his close up fighting was very effective. Both fighters took some very punishing blows which speak well for the condition they must have been in.

Considerable trouble was experienced in getting the fight arranged and it was not definitely decided until the night before the fight that it would be held. This naturally had a very poor effect on the attendance and when the fight was scheduled only two thousand tickets had been sold. The price of the tickets was then lowered to ten dollars in order to increase the sales, which attracted a much larger crowd.

Didsbury Pioneer Broadcast

Great interest was taken in Didsbury, especially among the sport fans, in the outcome of the fight. In order to provide the news hot off the air, the Didsbury Pioneer got in touch with Mr. Camp Doherty, who very kindly consented to install a radio set which was loaned through the courtesy of The Radio Corporation, Calgary. Mr. Doherty, with some assistance from Mr. Ed. Klaholtz, of our staff, set the equipment up in the Pioneer Office and from two o'clock until five a large crowd in front of the Office listened eagerly to the news which he heard very clearly and quite fully from the loud-talker. The set was tuned up to that of the C. E. C. N. broadcasting station of Mr. W. W. Grant, of Calgary, whose broadcast was the most clearly heard. The Pioneer called Mr. Grant on the phone and congratulated him on the able manner and clearness of his broadcasting and Mr. Grant acknowledged receipt of the message over the radio almost immediately. Many who were not able to be present at the Office kept calling on Telephone Central for information and in order to reach them our telephone was placed in front of the instrument with the receiver off, and their Central left their switches open, nearly one side of the switchboard being left open, thus broadcasting to the whole neighborhood.

Owing to the uncertainty of installing this instrument it had not been advertised as it would otherwise have been.

DIDSBUY BUTTER A BRANDON PRIZE WINNER

The following is a clipping from an exchange describing the Brandon Fair and shows how Didsbury stand in Canada in regards to butter making. It also gives great credit to the Crystal Dairy here and the Manager, Mr. Dooley, and staff, are to be congratulated on turning out the class of product.

The cattle at the fair is one of the largest in its history, all breeds being well represented. The exhibits in the dairy classes are particularly good and the competition will be very keen in all sections. There is a good showing of horses, sheep, swine and poultry. The creamery butter exhibit is the largest and one of the best quality ever shown at the provincial exhibition.

Shoal Lake Creamery, Shoal Lake, Manitoba, captured the sweepstakes for the highest average scoring in creamery butter, the Crystal Dairy, Didsbury Alberta, was second and Central Creamery, Calgary, third. Exhibits were entered all the way from Quebec to Vancouver. The judges were L. A. Gibson and D. F. McKeane, Ottawa.

Saving and Investing

"Investing" your money is a serious matter—not to be done in a hurry.

Think twice and ask advice before investing. Be guided by experience—preferably your banker.

Successful investors always keep in close touch with their bank.

"Double your Savings. It CAN be Done."

AROUND THE TOWN

WESTCOTT SPORTS, JULY 18th.

Miss Vera Sexton has arrived home for the holidays.

Mr. and Mrs. L. C. Coffey and family are visiting at the home of Mr. H. E. Omond.

Mr. John Edwards is travelling in the south country doing half a dozen jobs.

Mr. Harold Reiter who has been working at Claresholm arrived home last week.

Mr. Arnold Luermer left for Edmonton on Monday for a short while.

Miss Mac Studer who has been attending the Conservatory of Music at Toronto for the past year, returned last week end.

Mr. Dr. Clarke and children who have been visiting in Edmonton for sometime back arrived home last week.

In reporting last weeks court case it should have read that the charge was laid by Mr. L. Herter, who owned the land, instead of Mr. Adshead.

The Didsbury baseball team won two games away from home this week, one from Innisfail and one from Olds. The boys are stepping right along this year.

Mr. Dr. Clarke's three sisters from Edmonton, the Misses E. and R. Farrell and Mrs. Nixon and daughter Gwen, stopped off here for a few days on their way to the Coast.

The Hub Grocery changed hands this week when Mr. Miller, from Calgary bought out Bob Crookland. Bob it is rumored, is going to leave for the Coast shortly. Mr. Miller's family will arrive later.

Mr. J. Brett, Accountant at the Union Bank here, has been transferred and made manager of the Union Bank at Elbow. Mr. Brett was well liked in this district and will be missed in the bank here as an efficient officer.

Mr. and Mrs. Ed. Johnson left by car on Thursday, to the States for points in Ontario. Mr. Johnson has sold his business here to Mr. T. Sid. of Drumheller. Ed. has made quite a few friends during his stay in Didsbury, who will be sorry to see him leaving us.

Mr. and Mrs. P. B. Reed and family left for Calgary on Monday where they intend to reside in the future. Mr. Reed is travelling these days and it will be more convenient to have his home there. They will all be very much missed in Didsbury where they have lived so long.

Camp meetings here commence on Friday, July 6th and will continue till the 16th. A large attendance is expected this year and a wide and varied program is outlined. Besides the large tent a permanent building has been erected on the grounds, a dining room and it will also come in handy when it rains.

The Rural Situation In Canada

Some months ago Premier Drury of Ontario delivered an address before a gathering in Toronto in which very brief, if any, reference was made by this press, but an address worthy of the careful reading and earnest consideration of the men and women of Canada. The subject matter of this address had to do with the position confronting the Dominion as a result of the present unsatisfactory condition of agriculture—a situation full of actual peril to Canada, and one which is the concern of everybody, and not of the farmer alone.

In his notable address Premier Drury did not confine himself to the purely material and economic aspects of rural life, and as was but natural, and almost inevitable, he had some passing comment to offer on urban and industrial conditions as they present contrasts to rural and agricultural conditions. Pointing out that the life and well-being of all people, the very existence of people, depends on the land, Mr. Drury emphasized the national importance of a satisfactory solution of the rural problem.

Insufficient to the life of man depends on food, and that food, in our present state of existence and development, depends on soil. It follows that the soil becomes an organic part of the people's existence, becomes a thing as necessary to them as air, but it is a thing which many have proved time and again capable of destruction. Tyrannical monarchs, tyrants, tyrannical governments, have many times in the world's history destroyed the soil, most notably in the people's existence, and realms that have been thickly populated have become deserts because of the depletion of this one great asset—the soil.

There should be, therefore, to those who control the soil a sufficient reward deserved to bring into the control of the soil, the soul of sufficient intelligence or sufficient enlightenment, people of sufficient vision to treat this great and vital asset of the people, life in a way to ensure its permanence. Where there is insecurity in the landholding for reaping where he has sown, the most necessary of all acts deteriorates and terrible regions become deserts incapable of supporting human life. Because there is insecurity to the Canadian farmer today, there is peril to Canada, and it is of national moment that serious thought be devoted to the problem.

While it is true that boys and girls continue to leave the farms and drift into the cities and larger towns, it is equally true that, notwithstanding the fact that from one end of the country to the other the wages paid to skilled labor and the rewards in professional life are greater than the financial return to the farmer, people not only remain on the land but thousands of new comers continue to engage in the cultivation of the soil. Why is this so?

The reason is because deeply imbued in all of us is the desire to find joy in the work we do. Work is the God-given birthright of every man and woman. It is work that men find the greatest and most lasting joy—not in soundings of idle debauchery and intemperance in a never-end round of excited pleasure, nor in the occupations which may have been there is a joy to be found in filling the hours of leisure and leisure, which is not obtainable in the other occupation to anything like the same extent.

In dealing with all our modern industrial problems, and in the organization of our modern institutions, we are not, as Premier Drury intimated, struggling with a whole set of conditions resulting from the one simple fact that in most of what we call modern industrial employment we have divorced the workman from that which is his birthright—the simple joy in his work. Can the loss of that joy be made up to him by allowing him a share in the finances or responsibility? Can anything else supersede or supply that simple joy in work? Short hours of labor, but which are not filled with joy in that labor, are not a blessing but a curse. Big wages alone will not recruit the good workman. He is merely turned into a machine and does not find happiness, contentment, joy in his work.

In the days long past, the cobbler at his bench found content and joy as well as a livelihood in the making of a shoe, but in our present-day highly organized factories given over to quantity production, wherein the molding of a shoe is divided into eight or ten operations, what joy does a man find, what initiative is developed for good workmanship in doing the same thing over and over again, times without number, year in and year out? The man is no longer a workman, but a machine operative. Efficiency is gained at a sacrifice to the worker himself of that which is more important than hours of labor or wages, namely, joy in his work and contentment as his lot in life.

Rural life and enlightened parents provide that joy which the congenital and hereditary dispositions and excitements of the cities can never give. The simple rural people may be enabled to follow their hereditary inclinations and live close to the earthy conditions surrounding their life and activity. They are contented and live upon a sound basis. Canadian industrial existence and prosperity demands a solution of the rural problem. A solution found, and this Dominion will find most of its other problems melt away.

When old potatoes turn black in the water, add a few drops of vinegar to the water in which they are cooked; this prevents discoloration.

Mame—Heavens! What a lot of religions there are!—Boston Transcript

"I Can Now Do My Work Without Feeling Tired"

Mrs. A. Moffat, Roxton Falls, Que., writes:

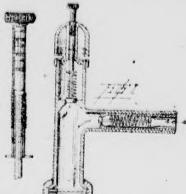

"I suffered from a run-down system and nervous debility. I could not sleep at night, and felt so weak I could not walk any distance. I took several tonics, but they only helped me while I was taking them. Moller advised me to take Dr. Chase's Nerve Food, and I felt great benefit from the first box, and continued taking several boxes. Today I feel like a new woman, and am able to do my work without that dreadful tired feeling."

DR. CHASE'S NERVE FOOD

50 Cents a box, all dealers, or Edmiston, Bates & Co., Ltd., Toronto.

NEW INVENTION ATTRACTS ATTENTION

AIR PRESSURE GAUGE THAT WILL PROVE A BOON TO THE MOTORIST AND OTHERS

W. A. DeWolfe, Consort, Alta., has recently secured a patent for an automatic air pressure gauge that has been proven to be a complete success. This gauge is commonly used for inflating automobile tires, and can be used with any method or pump or pressure tank for filling tires to any required pressure. When the number of pounds air pressure is reached, at which the gauge is set, the valve automatically relieves. No more air will enter the tire and a warning whistle indicates that the tire has been inflated to capacity. Every gauge is tested and adjusted at the factory, so that it will test absolutely the same, and will be correct in every particular.

W. A. DEWOLFE

The device is covered by Canadian Patent Application No. 210981, and United States patent has been applied for. The inventor, Mr. W. A. DeWolfe, will sell an interest in this patent, will sell it outright, or will arrange to retain certain rights on a royalty basis. Mr. DeWolfe is a well-known western newspaper man, being publisher of "The Enterprise," Consort, Alberta, a weekly newspaper that enjoys a large circulation and holds a considerable influence in the district in which it circulates.

Taking Care Of Tourists

In view of the large increase in tourist numbers, the Saskatchewan Ministry of Trade is considering the suggestion that a government go contractor for the construction and maintenance of tourist camps along the routes of travel. It has been suggested on the Northern side of the river. The Board of Trade and the City Council will be asked for cooperation.

When Holloway's Corn Remover is applied to a corn it kills the roots and the stalks come out without injury to the plant.

Postal Delivery By Air

Time For Crossing Continent Cut By Twenty Hours

Last year twenty planes carried half a million letters every day between New York and San Francisco. They did not fly at night or on Sundays or holidays. During the night the mails were relayed on to fast trains. Forty planes make 5,000 flights between the two distant points into which the route is divided. Nearly 3,000 flights were in stormy weather or fog. Of these only 300 resulted in delayed mail. Crossing the Rockies they had to climb to 12,000 feet to hurdle the continuous gates and snowstorms across the mountain passes. They seldom had to shoulder a flight except for mechanical trouble. The time for a letter to cross the continent was cut from 16 to 8 hours.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists, Apothecaries and Chemists in Canada and the United States are invited to manufacture, to sell the public against imitation. The Tablets of Bayer Company will be accepted with most general trade marks. The "Bayer" name

Favorable Crop Prospects Are Reported From The Three Prairie Provinces

Winnipeg.—With growth generally satisfactory and favorable weather conditions during the past week, the crop throughout the three prairie provinces is making good headway, states the weekly crop report issued by the Agricultural Department, Canadian Pacific Railway. There is very little cutworm damage reported, but grasshoppers are prevalent in certain districts, principally in Saskatchewan and Alberta. The damage is not yet extensive, there is an ample supply of poison material, and mining stations are being established where necessary.

Manitoba has experienced excellent crop weather during the past week and seeding is almost completed. The recent precipitation and present heat has brought the crops along quickly. Pastures are in good condition. Manitoba crops are not suffering from grasshoppers.

Seeding of corn fields in Saskatchewan is rapidly nearing completion. Early grain is up to eight inches and is sturdy and of good color. Hot weather has brought out grasshoppers in large numbers, particularly west of Assinabika and in the territory east of Vanscoy.

Nearly all sections of the province of Alberta experienced heavy rains during the week, the report says, particularly in the north where it was badly needed. Seeding is entirely completed and crops are doing well. Grasshoppers are causing some concern in the southeast portion of the province and as far north as Medicine Hat.

On the Edmonton, Dunvegan and British Columbia Railway weather has been hot and dry. Growth has been somewhat slow on account of the lack of moisture.

In British Columbia all fruit has set well. In irrigated districts water is plentiful and general conditions are favorable.

Cattle Bring High Price

50 Head Sold at Saskatoon at Average Price of \$135

Saskatoon.—Fifty-three head of cattle, at an average price of \$135, changed hands at the auction sale under the auspices of the Saskatchewan Cattle Breeders' Association. The sale, which was declared to have been the most successful of any held so far this year in the prairie provinces, was topped by two Shorthorn bulls, bred by W. A. Paul of Guyan, Sask., Stanley Marquis, grand champion of his breed in the show which preceded the sale, fetching \$235, and his full brother, a yearling, bringing \$280. Six Hereford bulls averaged \$145.75.

Although the Provincial and Federal governments were represented at the sale by agents, nearly all the buying was done by farmers.

Will Advertise

Canadian Product

Canadian Binder Twine for the King's Estate

Welland, Ont.—A shipment of red binder twine has been made by the Plymouth Cordage Co. of Welland, to their agents at London, England, for use in the estate of King George VI. The order, the first of the kind received from His Majesty in Canada, amounts to ten bales or 200 pounds, and was ordered through the agency of the Plymouth Cordage Co.

While the order is perhaps small, it is a big advertisement for Canada and places a Canadian product in the hands of His Majesty.

Japs Dictate Terms

Toronto.—The cabinet has decided to submit to K. A. Joffe, the envoy of India, who is now in Japan, conditions under which the Imperial Government is willing to resume negotiations with the Soviet.

Will Meet Payment

New York.—Great Britain is understood to have purchased Liberty Bonds and established dollar credits here sufficient to meet the next instalment of \$40,000,000 on her war debt to this country, due June 15.

Ready To Construct Fort Alexander Line

Railway and Pulp Mills Will Employ 2,000 Men

Winnipeg.—J. D. McArthur, manager of the Fort Alexander railway, states the weekly crop report issued by the Agricultural Department, Canadian Pacific Railway. There is very little cutworm damage reported, but grasshoppers are prevalent in certain districts, principally in Saskatchewan and Alberta. The damage is not yet extensive, there is an ample supply of poison material, and mining stations are being established where necessary.

Manitoba has experienced excellent crop weather during the past week and seeding is almost completed. The recent precipitation and present heat has brought the crops along quickly. Pastures are in good condition. Manitoba crops are not suffering from grasshoppers.

Seeding of corn fields in Saskatchewan is rapidly nearing completion. Early grain is up to eight inches and is sturdy and of good color. Hot weather has brought out grasshoppers in large numbers, particularly west of Assinabika and in the territory east of Vanscoy.

Nearly all sections of the province of Alberta experienced heavy rains during the week, the report says, particularly in the north where it was badly needed. Seeding is entirely completed and crops are doing well. Grasshoppers are causing some concern in the southeast portion of the province and as far north as Medicine Hat.

On the Edmonton, Dunvegan and British Columbia Railway weather has been hot and dry. Growth has been somewhat slow on account of the lack of moisture.

In British Columbia all fruit has set well. In irrigated districts water is plentiful and general conditions are favorable.

Amusing Derby Incident

Premier Baldwin Refuses to Adjourn Parliament to Attend Races

London.—There was an amusing Derby incident in the House of Commons yesterday. After adjourned debate, the committee of the House had accepted the invitation of the Jockey Club to visit Epsom. The Premier would consider the advisability of reverting to the ancient custom of adjourning the House on Derby day to give the honorable members an opportunity of studying the possibilities of the proposed betting tax.

Premier Baldwin replied in the negative amid cries of "Order."

Big Bombing Plane

Huge British Bomber Will Get Trial Flight Soon

London.—England's largest flying plane, a huge bomber built in for the Air Ministry, will soon be given to the Royal Flying Corps.

According to the Daily Express, the plane is built entirely of steel, with the engine fastened in its center, completely armored against anti-aircraft guns.

The engine room will be in charge of a mechanic, thus leaving the pilot to operate the lifting and steering levers without regard to the engine.

Young Goldstein and the crew were alone in the store. The bandits bound the girl with a picture wire, filled a satchel with the most expensive pens in the shop, and hurried out to a waiting automobile.

New Zealand Must Share Naval Expenses

Will Help Support Singapore Station, Says Premier Massey

Wellington, N.Z.—Addressing a public meeting Premier Massey said New Zealand would have to do more for naval defence. The Dominion could not sit back and let the English taxpayers bear the whole extra expense of the proposed Singapore naval station. New Zealand and Australia would have to bear their share of the cost, he declared.

Still Hold Captives

Washington.—The State Department announced R. H. Lodge received a cablegram from Jacob Gould Schurman, American Minister at Peking, which said there was "no definite information" of how long it would be before Americans and others still held by the Chinese bandits are released.

Minister Schurman reported that charwoman appears to have been restored to the bandit camp and the captives are not suffering in health, though they are getting somewhat low in spirit."

U.S. President to Speak in Vancouver

Washington.—President Franklin will make 14 addresses on tour to the Pacific Northwest, Alaska and Canada, speaking in five coast cities after returning from Alaska, according to an official announcement of the executive itinerary made public at the White House. Returning from Alaska the President will speak in Vancouver July 26.

Would Postpone Union Action

Toronto.—A suggestion that the Church of England defer action in connection with church union until the great bodies which have the matter in hand shall have settled it to their own complete satisfaction was advanced by Bishop Sweeny at the meeting of the synod of the diocese of Toronto.

WESTERN EDITORS

O. S. Sudgen, Editor and Proprietor of The Herald, Harris, and Times-Ticker, Sask.

Advisory Committee for Empire Conference

Will Draw Up Programme and Assist During Proceedings

London.—Sir Eric Geddes, of the Federation of British Industries; Sir Ernest Gowers, of Gowers Brothers shipowners, ship and insurance brokers; London; Arthur Ballou, master cutter, Sheffield; and J. W. B. Pease, deputy chairman of Lloyd's Bank Limited, have consented to act as an advisory committee to draw up a programme for the Dominion Imperial Conference and to assist during the conference proceedings. This is in response to an invitation to them from Sir Philip Lloyd Greene, president of the Board of Trade, to undertake this work and follows a precedent set at the general conference.

Gotham Burglars Make Haul

\$7,000 in Gems Secured By Bandits

New York.—Four armed bandits entered the jewelry store of Barnett Goldstein here, held up the proprietor's son and clerk, and escaped with \$7,000 worth of jewelry.

Young Goldstein and the clerk were alone in the store. The bandits bound the girl with a picture wire, filled a satchel with the most expensive pens in the shop, and hurried out to a waiting automobile.

New Zealand Must Share Naval Expenses

Will Help Support Singapore Station, Says Premier Massey

Wellington, N.Z.—Addressing a public meeting Premier Massey said New Zealand would have to do more for naval defence. The Dominion could not sit back and let the English taxpayers bear the whole extra expense of the proposed Singapore naval station. New Zealand and Australia would have to bear their share of the cost, he declared.

Investigation Of Combines

Ottawa.—The House of Commons accepted the senate amendment to the bill to provide for the investigation of combines and mergers. The amendment provides that the complaint to be filed with the Government to initiate inquiry must be made in the form of a solemn statutory declaration.

New Reparations Offer Made By Germany Will Be Considered

Messages Transmitted

In Sender's Writing

Facsimile Reproduction Made Possible

By Frenchman's Invention

Paris.—Telegrams transmitted in the sender's own handwriting can be sent over two telegraph lines open to the French post office for this purpose, one between Paris and Lyons, and the other between Paris and Strasbourg.

The invention which renders this possible is due to M. Belin, the Frenchman who perfected the system of the telegraphic transmission of photographs.

The sender of a telegram writes his message with a special ink. The message is then placed on a rotating cylinder in the "telephotograph" apparatus at the central office in the Rue de Grenelle. The cylinder is in contact with the cylinder connected with the telegraphic circuit.

The device is broken every time the needle touches the handwriting and the movement is reproduced on a synchronized receiving cylinder at the other end, at Lyons or Strasbourg. The receiving cylinder will show definitely a facsimile reproduction of the "telephotogram."

Heavy Wind Starts Forest Fires Again

Officials Fear Most Serious Losses in New Brunswick

Fredricton, N.B.—Fanned by repeated fires by heavy winds, brush and forest fires in the northern districts of New Brunswick have been raging again to such an extent as to cause serious apprehension upon the part of officials of the Department of Lands and Mines here that the losses on timberlands may be the most serious in the history of the province.

A safeguard on three sources of revenue, the note says the German Government reserves the right to provide funds from any other source, should any of those mentioned fail.

The note suggests that final settlement of such a great question as reparations cannot be reached through interchanges of notes; hence it is advisable to summon a conference to discuss differences.

Berlin.—The life of the note can not depend on the reception of the new reparations offer now on its way to the Allies, but in the event of strenuous opposition, then man and other because of failure to reach an conclusion with the Allies that will clear Germany's present burden, the editor of the *Evening Sun* is understood to have proposed:

1. Payment of approximately a billion and a half gold marks early.

2. Settlement of the exact amount to be left to an international conference. Contents of the document will be officially divulged upon receipt by the Allies.

It is learned authoritatively that Germany has proposed the reparations amount be raised in the following ways:

Consumption taxes on such commodities as tobacco, sugar and brandy and a customs monopoly on the same three. These taxes, it is estimated, would provide 400,000,000 gold marks a year.

Placing of a gold mortgage amounting to 10,000,000,000 marks at five per cent interest against the railways, yielding 500,000,000 gold marks annually.

Legal mortgages on industries, factories and land owners totalling 10,000,000,000 marks, which it is conceded would yield another 500,000,000 gold marks.

A special property tax which it is hoped would provide 100,000,000 gold marks a year.

As a safeguard on three sources of revenue, the note says the German Government reserves the right to provide funds from any other source, should any of those mentioned fail.

The note suggests that final settlement of such a great question as reparations cannot be reached through interchanges of notes; hence it is advisable to summon a conference to discuss differences.

British Capital Forthcoming

Assurance Given Vancouver Trade Delegates at Hull

London.—Canada need have no fear of not getting capital from England so long as the investors are offered security and assurance that there will be no reorganization of British capital, said Peter G. Smith, president of the Hull Chamber of Commerce in welcoming the Vancouver trade delegation. He said he hoped Hull would get a direct line of steamers plying between this city and Canada. Hull possessed some of the largest flour mills in the world he added.

One of the members of the touring trade delegation stated that the five per cent preference granted by Canada to British traders was not sufficient when the Canadians had to meet competition from the United States. The Vancouver delegation later visited Manchester.

Employment Offices In Saskatchewon Busy

Nearly Thousand Given Work During One Week

Regina.—Work was found for 900 persons by the employment service offices in the province during the week ending June 2, including a total of 338 farm hands. Vacancies unlisted at the end of the period numbered 651, and applicants registered as unemployed 259.

The placements by offices were as follows: Regina, 219; Saskatoon, 281; Moose Jaw, 249; Swift Current, 56; Weyburn, 25; Yorkton, 37; Prince Albert, 26; Estevan, 28; North Battleford, 27; Melville, 6; and Kindersley, 4.

Penny Postage For New Zealand

Wellington, N.Z.—The New Zealand Government announces its decision to re-introduce penny postage. The government intimates also that it expects to reduce the income tax so as to make the maximum tax 40 cents on the pound instead of 88 cents as at present.

WEDNESDAY, JULY 4th.

CANADA'S PROSPERITY

* * *

Through Us Or In Spite of Us?

When the war was on and this country was putting forth every effort, at home and overseas, to aid the allied cause, a great spirit of confidence and faith, of willingness to work, economize and sacrifice filled every class of the community from the highest to the lowest.

As a result, Canada's honourable war record has set her high among the nations, with a place at the Imperial Council table and a voice in international affairs.

Canada must and will come, with equal honour, through the troublous times of post-war adjustment. The only question is, will all of us help or some of us hinder by pessimism, apathy, or class jealousy?

To the Canadian farmer this question comes with a peculiar force. Agriculture must be the economic balance wheel of this or any nation. It is an occupation where nature herself demands energy, courage, economy and efficiency. These sturdy qualities radiate from our farms to industries in other walks of life, where so many leaders were born and bred.

The farm home and farm life is the source of what has been and is the strongest and truest in our national character is interwoven with the history of Canada from its infancy. The settlers on the shores of New Brunswick and Nova Scotia, toiling to clear a patch of forest and sowing their grain among the stumps; Hebert and the pioneers of New France, fighting Indians, enduring privations, wrestling merely a rude living from their small acreage, but full of faith in the future, yet not for them, then for generations yet to come, the men who rescued Upper Canada from the wilderness Red River colonies, who, after two years of complete destruction of their crops, sent a party to the Mississippi for seed grains for the next year and won. These are made possible the Canada of today.

The farmers of Canada, then, have a rich history and a noble tradition to live up to. Upon them Canada's progress has always, in the main, depended, upon them it will always remain, in the main, dependent.

What, then, is necessary for the farmers of today? Simply the application of those qualities we have referred to—energy, courage, economy and efficiency, and, under present-day conditions, the return of labour and speedily. A very high percentage of farms owned by farmers in this country have been acquired and paid for in the farmers own lifetime. For the present and future generations there is exactly the same opportunity. True, with each generation and perhaps oftener, we may have to change our type of farms to meet changing market requirements, but surely that is a task far easier than compared with that of those who had to establish them.

Live in a new country, create their home, their community, their markets and their civilization.

During the war years, the farmer like most others, became increasingly optimistic. As in other industries, he over-capitalized, tied up too much money in extravagant buildings and expensive machinery, bought fractions to get the crops in more quickly and easily, without considering whether the actual earning power of these warranted the investment. With the depression which has followed, this over-expansion has been a serious burden and has shaken the faith of some in ultimate success.

We must get back the independent courage and untiring effort of Canada's early days. The farmer must remember that in the last analysis

Continued on page 4

Here and There

Gold production in Canada in 1922 passed the million ounce mark for the first time since 1902.

Public works to be undertaken in Vancouver this year will cost in the neighborhood of \$10,000,000, of which \$3,000,000 will be spent by the Canadian Pacific Railway on pier construction.

The Canadian Pacific steamship Montcalm carried 900 emigrants for Canada on her last voyage from Liverpool, the largest number of emigrants to leave that port this year.

Work was commenced last weekend on the new pier at the foot of Granville Street, Vancouver, which will cost approximately \$2,000,000 to complete. The new elevator will have a storage capacity of 1,500,000 bushels.

Three thousand seven hundred fifteen grain elevators in Manitoba, Saskatchewan, and Alberta have a total storage capacity of over 1,000,000 bushels. Ontario, Quebec and Maritime provinces have storage elevators with capacity up to 33,180 bushels.

The first Index of Free and Accepted Masons in the history of the Merchant Marine World, was recently organized on the Canadian Pacific liner Empress of France, when crossing the Mediterranean Sea, a party of 500 Canadian and United States tourists.

Four thousand seven hundred and eighty-four cars of last season's fruit crop have been shipped out of the Okanagan district of British Columbia up to February 14th, according to statistics given by the Canadian Board of Trade recently by F. W. Peters, general superintendent of the Canadian Pacific Railway, B.C. division.

Sault Ste. Marie.—The new downtown ticket and telegraph office of the Canadian Pacific Railway and the Canadian National Railways is located on the corner of Queen and Melville street, in the building formerly occupied by the Public Utilities Commission. It is one of the finest in the province. There are large offices in the larger cities, but none of these are better equipped.

Herold Bindl, divisional engineer for the Canadian Pacific Railways, who has been located at Vancouver for the past thirteen years, and E. F. G. Smith, manager of the division in Alberta at Calgary, have exchanged posts, it being the company's policy to develop its engineers by giving them experience with the varying conditions in different parts of the Dominion.

A number of western interests have arrived and claim the Canadian Pacific steamship Britannia, and the vessel will sail from Montreal on August 1st for Port Churchill, for the purpose of proving to the world that the interior of the Great Lakes can be of value for navigation to and from Hudson's Bay can be made a commercial success. Between three and four hundred passengers from the west will make the trip.

J. S. Brown, president of the Brown Paper Company of Edmonton, Alta., returned on the Niagara last week from a three month's visit to Europe. He was present in Germany when the French invaded the Rhine, and he said the two countries were very friendly between the two races. On the other hand, a Canadian, American or Britisher was given a cordial welcome; this being largely due to a speech which Lloyd George made in a compromise. Travel in Germany, he said, was surprisingly cheap, he having made one trip of nearly 150 miles for the sum of fifty cents in Canadian currency.

When the Canadian Pacific steamship Metassina, bound for Glasgow, reached her destination, Captain G. B. Evans, her commander, will have completed his last voyage in command of the ship. He is the third highest rated commander in the service of the Canadian Pacific Steamship Line, and after his retirement he will be given a pension of \$1,000 per month, which time he crossed the Atlantic in command of 578 tons, and conveyed 217,922 passengers, of whom 71,000 were Canadian and American troops. He will be 65 years of age in November when this ship was sunk by the Germans in 1915, and he will be remembered by many passengers as the captain of the Minnedosa or the Montcalm or the Empress of Scotland.

"Raw From Eczema
Doctors Do Their Best"

"For years I suffered. One leg raw from eczema. I could not sleep at night because what I suffered. It was D.D.D. that relieved me and for three years I have had no trouble. Now I am well again. These words are taken from the letter of R. A. of Alberta, who has written to us to say that he is now well again. If you suffer from eczema, we will answer any questions you care to ask him. If you haven't tried the cooling, healing D.D.D. lotion, you are missing a treat. Try it, today. For personal guarantee of results, see a doctor. Try D.D.D. today."

Cords dry, sound pine and poplar
blocks; Stio staves for silo 14x25 ft.
tongued and grooved; painted cut
ready to put up; Reutting boards; 15
iron loops and lugs; and some other
articles.

Sale at 2 p.m. sharp.

G. SCHULTZ, Owner.

J. W. PHILLIPSON, Auctioneer.

CANADA'S PROSPERITY

Continued from page 5
alys he is infinitely better off than
the wage-earner of the city. True,
his income may sometimes be
small, but he can, at the very worst,
gain his living from the soil, while
in the city a larger wage soon
wears away in paying for things
which on the farm involves no cash
outlay. The farm products are
necessities of life and must always
command a market. The products
to city industries must often create
their market and their sale is sub-
ject to wide fluctuations. Sure of
a market, then, the farmer's main
problem is simply lowering of cost
of production to permit of a fair
margin of profit even at present
prices. This can be done and is
being done. We may call attention
to the advertisement placed in this
issue by the Federal Department of
Agriculture. It is more than an
advertisement; it is a call to united
and cheerful effort, a summons to
the Canadian spirit of the will to
win which has burned so brightly in
Canadian history—a spirit which is
as well shown in a message received
in Ottawa only a few days ago from
one of the foremost farmers of the
Provinces of Alberta. He says: It
is started to rain the last part of the
week, and this coming after the re-
cent heavy rains has put the soil in
a condition that it has not been in
at this time of the year since 1916.
The farmers are consequently very
optimistic and if optimism could per-
sist the farmers of Southern Al-
berta could by next fall cancel our

National Debt."

WESTCOTT SPORTS, JULY 18th.

Aim of Moderation League of Alberta

The Moderation League of Alberta in the campaign
now opened seek the co-oper-
ation of all citizens of Alberta
who believe that good
government comes by gain-
ing the consent of the
people, and their hearty
support in the enforcement
of law.

In the seven years of the
operation of the present
Liquor Act it has been demon-
strated beyond question
that there is an ever in-
creasing number of citizens
of Alberta who are using
liquor as a beverage and
this gives rise to the ever
increasing and energetic
bootlegger who has accum-
ulated millions which should
have gone into the hard
pressed treasuries of Alberta.

The Moderation League
of Alberta seek to be of
service to the people of Alberta
in assisting to place the
government of Alberta
in control of the sale of
liquor and revenues rising
therefrom. Advt.

Lumber is Down

"Yes, lumber is down." Down to where a farmer can afford to build anything that can be made of lumber, even in the face of a low market on farm product.

Lumber was the first great commodity to go up and the first to come down.

TODAY LUMBER PRICES

are down to where it is hard to see how they can go any lower.

BARN OR HOUSES

or just some boards for fixing up around the place, the fact about lumber will appeal to any man or woman who believes in thrift and knows values.

COME IN TODAY

and talk over your practical problems, we want to be helpful and we welcome an opportunity to show you.

Get it now and enjoy life.

YOURS FOR VALUE

A. G. STUDER

**YOU GET
THE AMOUNT OF THAT CHEQUE**

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that great magazine together with our own weekly at the one price of both publications.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established and reliable. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery, from a windmill-engine to a tractor. It is well informed and up-to-date in every branch of farming both from the practical and theoretical standpoint. Every month the magazine publishes extensive articles by readers. Many of these are short-cut findings that are real money-savers to farmers.

This offer may be withdrawn at any time. Without doubt your interest is reflected in the fact that we are taking advantage now. Your subscription to this weekly together with a year's subscription to the CANADIAN POWER FARMER for the same price as this weekly alone. This is where you get the \$1.00.

Mail your cheque or drop into our office the #100
time you're in town.

g

**Canada Confident
of the Future**

CANADA is endeavor-
ing to regain her
place in the world
after the war strid-
e in the midst of many
difficulties—debt,
deflation and depression being
some of them.

Quack remedies and academic
theories beset her path on every
side. Some suggest that our debt
worries can best be eased by going
further into debt. Others
preach blue ruin, decry their own
country and indulge in mis-
chievous propaganda generally,
while still others look for a new
social order. All these are incongruous
signs to indicate a better coming
affair. All this in apparent forget-
fulness of the fact that just as
there was no royal road to win
the war, there is now no royal
road to pay for it or regain our
former buoyancy, vigor and
confidence.

Some are leaving Canada hop-
ing to escape taxation, only to
find there is no escape anywhere.
In seeking for easy remedies too
many of us overlook the fact
that the greatest remedy is honest,
hard work faithfully and
intelligently performed, accom-
panied by old-fashioned thrift.

It takes time, it takes patience,
it takes grit. But every Canadian
knows in his heart that Canada
is coming through all right.

Our Experience Proves It

Look back over the path Canada
has trod. The French Colonists,
cut off from civilization by 3,000
miles of sea, faced a continent—
a wilderness—without the aid of

even a blazed trail. They had
to fight savages, frosts, scurvy,
loneliness and starvation.

The United Empire Loyalists
subdued an unbroken forest in
one generation, growing their
first wheat amid the stumps and
scars of the new clearing.

The Selkirk settlers came to
Manitoba when the prairie was a
buffalo pasture, and grew wheat
where none had grown before
and where those who knew the
country best at that time said
wheat would never grow. To-
day the Canadian prairies grow
the finest wheat in the world.

In proportion to population Can-
ada stands to day among the wealthiest
nations in the world, with average
savings on deposit per family of
\$800. Canada's foreign trade per cap-
ita is second highest among the
economical nations, being \$192 per capita in 1922-23, as
compared with \$135 in 1913-14, the
"peak" year before the war.

**New Opportunities for
Canada**

In Canada, although prices in
the world markets fell below war level,
our farmers reaped last autumn the
largest grain crop in Canadian his-
tory, and Canada became the world's
largest exporter of wheat, thus in
large measure making up for lower
prices.

Last year Great Britain, after an
agitation extending over thirty years,
removed the embargo on Canadian
meat, and a profitable and practically
unlimited trade is opening up for
Canadian stockers and feeders.

"The 20th Century belongs to
Canada"—it Canadians keep faith.

The next article will suggest prac-
tical opportunities for profit making
on our Canadian farms.

Have Faith in Canada

Authorized for publication by the
Dominion Department of Agriculture
W. H. MOTHERWELL, Minister. Dr. J. H. GRISDALE, Deputy Minister.

151

Folows use of Caturcine Soap and Caturcine Ointment. On the scalp it cures dandruff and itching. Next morning shampoo with Caturcine Soap and water. Send 25¢. Sold throughout the Dominion. Canadian Deposit: Lomas, Limited, 245 St. Paul St., Montreal. "Caturcine Soap leaves without greasy film."

**WORLD HAPPENINGS
BRIEFLY TOLD**

The King and Queen laid the corner stones of the hospital buildings being added to the University College Hospital and London University groups.

A license has been issued to the Duke of Devonshire which will enable him to have oil on his Derbyshire estate.

It has been decided to set up a great Armed War Memorial on the Somme battlefield where the French and British armies fought side by side for our country.

The opinion advisory committee of the League of Nations adopted the proposal of the French Government to increase the penalties against illegal traffic in opium and drugs.

It is announced that Bonar Law, during the early days of the war, had his estate valued and made a voluntary gift of one-quarter of it to the British Exchequer.

George Barfoot, French aviator, successfully completed a round trip flying flight to West Point, N.Y., using but two of the three gallons of gasoline in his fuel tank in negotiations the journey of more than 190 miles.

Attackers by Asthma.—The first fatal repetition of an asthmatic which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kelllogg's Asthma Remedy seems神奇的. It is a simple, safe, easily absorbed remedy, which helps the stomach, strong digestion, good blood, pure complexion, clear spirits, bright and happy. Price 25¢ at all dealers.

What the Stores Attract.—This first location of Canadian stores, called "Retail," at Liverpool, Scotland, consisting of 500 head, were 14 days on the water. During that time they consumed 200 boxes of hay and 500 bags of grain.

Oldest U.S. Newspaper

New York *Globe* and Commercial Advertiser Founded in 1793.

Announcement is made that Prof. A. Murray had bought the New York *Globe* and Commercial Advertiser. The *Globe* and Commercial Advertiser is the oldest daily newspaper in the United States, being in its 180th year. It has an unbroken record of publication since December 9, 1792. Other papers started earlier, suspended and revived, but none equals it in continuous publication. The *Globe* and Commercial Advertiser has undergone mergers and changes of name, but its career as an institution is uninterrupted for more than 129 years.

Its first editor was Noah Webster, author and founder of another institution that survives to this day—"Webster's Dictionary." Noah Webster and George Hunt, partners in the newspaper enterprise, signed their agreement on September 2, 1793. In Hartford, Conn., one of the chief centers of United States journalism.

**Regulate the Bowels
And You'll Be Healthy**

To Overcome Constipation and to Keep the System Free of Wastes
You Need

DR. HAMILTON'S PILLS

Always Prove a Mild, Yet Certain
Regulator

Three fortunate people who have proved the value of the **Dr. Hamilton's Pills** have got well in the habit of performing a certain function at a certain time and thereby restore normal conditions. Dr. Hamilton's Pills are now being used by thousands of people to keep the stomach strong, digestion good, blood pure, complexion clear, spirits bright and happy. Price 25¢ at all dealers.

What the Stores Attract.—This first location of Canadian stores, called "Retail," at Liverpool, Scotland, consisting of 500 head, were 14 days on the water. During that time they consumed 200 boxes of hay and 500 bags of grain.

CATARACHI.—Cataract is a local disease, greatly influenced by environmental conditions. **HAILEY'S CATARACHIC OINTMENT**, and so through the blood upon the external surfaces of the eye, **HAILEY'S CATARACHIC OINTMENT** restores SIGHT to rendering normal conditions. Price 25¢ each. F. J. Conley & Co., Toledo, Ohio.

Resumes Trade With Germany.

For the first time since the war began, the trade with Germany is again open, on the Winnipeg Grain Exchange recently, when a local commission house purchased a wheat shipment to some German interest. No information of the selling price could be obtained, nor of the trade or quantity sold.

The Oil for the Athlete.—In rubbing down, the athlete will find **Thomas' Electroline Oil**, an excellent article. It is a fine, non-oily, non-greasy, pleasant smelling oil, which cures the soreness out of them and strengthens them for sports that may be put upon them. It stands pre-eminent for this purpose, and nothing else for years, having been used in every sport.

Sometimes a little credit is a dangerous thing.

Some of the children from suffering poor scenes by using Miller's Worm Powder, a most effective vermifuge, with which to combat these insidious foes of your young and tender. It cures worms, vermin, diseases, etc., when its qualities become known in a household no other will be used. The medicina acts by itself, requiring no preparation for this purpose, and on thorough treatment to rid you of them.

And **Lynchitis** is always hard to stop, as an experienced Texas man pointed out to us the other day, because you can't keep men from showing their bravery when they have the numerical advantage of 500 to 1.—Kansas City Star.

**League of Nation Members**

Forty One Nations Were Represented
At First Meeting

The League of Nations was created by the peace treaty signed at Versailles on June 28, 1919. The first meeting of the assembly of the League of Nations was held at Geneva, Switzerland, on Nov. 15, 1920, at which 41 nations were represented. These included France, Great Britain, Italy, Belgium, China, Romania, Portugal, Spain, Sweden, Japan, Holland, Brazil, Argentina, Chile, Uruguay, Venezuela, Canada, Czechoslovakia, Switzerland, Austria, Hungary, Cuba, Denmark, Greece, Guatemala, Haiti, India, Liberia, Nicaragua, Norway, Panama, Paraguay, New Zealand, Peru, Puerto Rico, Poland, Salvador, Spain, South Africa, Venezuela, Serbia.

**Is Your Nose
Stuffed With Cold?**

Don't load your stomach with couch potatoes.

Send healing medicine through the nostrils and send it to the air passages that are clogged with catarrh.

It's easy to get rid of both cold and strengthen a weak throat by inhaling Catarrhzone from your drugstore today. And frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment may be small change for a substitute. By mail from the Catarrhzone Co., Montreal.

**Determining How Far
X-Rays Can Penetrate****Committee Investigating Complaints
Of Persons Living Near Clinics**

How far X-rays extend and whether the powerful light beams continue indefinitely, injuring and harming persons in their path at a considerable distance away, is a question taken up by the Ministry of Hygiene, London, in its investigation.

Dr. Deere, of the Academy of Medicine, is presiding over a committee of members which includes Mame Curie, M. Blaquier, a radiologist, Dr. Vaillant, and a number of specialists.

The investigation is the result of complaints of persons living near to clinics where X-rays are in operation several hours daily.

Suits were started against a doctor by neighbors who alleged that their health had been impaired. Two cases of cancer were alleged to be due to X-rays penetrating through the skin and the walls of the clinic, traversing a wall and passing through another wall.

**HOW DELICATE GIRLS
ARE MADE STRONG****Rich, Red Blood Needed to Keep Up
Their Vitality**

It should be constantly borne in mind that pale, bloodless girls need plenty of nourishing, plenty of sleep and regular exercise, especially if a lack of appetite and tiredness, aching limbs tend to hinder progress. So when the thin, blood-thinnered girl, she must have new rich red blood and plenty more of it, and a diet of meat and well and well Williams' Pink Pills.

These pills not only enrich and increase the blood supply, they help the appetite and build the body, bringing new health and strength and transforming anaemic girls and women into cheerful, happy people. Among the many girls who have been helped to a renewed health through the use of Dr. Williams' Pink Pills is Miss Lydia G. Garneau, Preacher, who says:

"I was very run down condition. I could not eat, did not sleep well and was fast becoming an invalid. I was subject to fainting spells and constant exhaustion, but I got in company as I never knew when a fainting spell might come on. After several fruitless treatments, I was sent to try Williams' Pink Pills, and after the first two boxes were used I felt an improvement. I kept on taking them, and gradually sank into health. I am now a person with a new lease of life to this medicine, which I chemically owe to other ruta down girls."

If you are weak or ailing, avail yourself of the many home treatments with Dr. Williams' Pink Pills, and you will be among those who rejoice in regained health. These pills are sold by all dealers in Canada and the U.S.A. and can be had at any drugstore. See our box below.

An Innovation For Travellers

"Wastful Walking" is the motto in Berlin, where a bath house has been installed in the city's largest railway station. Travellers may utilize their spare time with a bath while awaiting their trains, and officials report that many arrive 15 or 20 minutes early that they may take a plunge in the tub before starting their journeys.

A THLETES!

RUGBY C. U. C.

The Rugby C. U. C. wish to express their hearty congratulations to both Mr. and Mrs. Ace Eder and Mr. and Mrs. Robert Blain.

The Club held a business meeting on Saturday night, June 20th. Wallace Hughes took the chair. The new officers that were elected were as follows—President, Wallace Hughes; Sec.-Treas., H. Hampson; Outdoor Sports convenor, E. Sworn and Otto Kiebler. It was also decided that the grounds should be leveled off at the earliest possible date and that tennis and basketball would then be able to be played.

We hope to see all the young folk out at our next meeting which is on Saturday afternoon, July 13th. Everyone come out and enjoy yourselves.

New Lamp Facilitates Night Work

1 and 2, views of wire as illuminated by incandescent lamp. 3, looking at the engine in the same light.

In the past interruptions to telegraph service caused by damage to outside wires could only, in the majority of cases, be located after the damage had occurred and the damaged section could easily be located. There is no doubt this was a disadvantage which delayed the recovery of interrupted services. Where the trouble may have been, anyone who along the line has a telephone instrument, it was not possible to take care of the interruption especially at night. To overcome this disadvantage due to night interruptions to its wires, the Canadian Pacific Railway has equipped all the linemen with a device which enables them to successfully take care of interruptions and do their work at night as well as during the day. The special lamp is connected directly to the dynamo which provides the power for the dynamo turbines with which all Canadian Pacific locomotives are equipped.

The special lamp in itself is of simple construction and is powered by the dynamo turbine from the locomotive which provides electricity for the illumination of the headlights and cab lights. A headlight globe is used and is especially designed to reflect the light downwards so that the beam is directed downwards. The reflector throws a beam sufficiently strong to allow working operations at a distance of 600 feet. The

intensity of the lamp is so much that can affect the Telegraph System, such as fire alarms, lightning, snow, wind and rain, the advantage of being able to locate the source of trouble cannot be overestimated and time and time again, when the lamp has been used during the night, it has been found that the electric hand lamp, which is now used throughout the System, has been of great benefit. During the past winter when the severe weather conditions made a number of interruptions, this lamp was often used during snow and sleet storms and not in one instance is it known of its having failed to meet all services put upon it. There is no doubt that the perfection of this lamp has been a decided progressive step in telegraph maintenance at night.
